

HELPING HANDS FAMILY

Welcome to our 2010 News letter edition VI

With much honour, I extend my regards to our beloved sponsors and donors. I thank you so much for your co-operation and support materially, financially, spiritually and morally wherever need arises in Uganda. HHF in Uganda we are so much happy for educating the Ugandan children who are the hope for the future and builders of tomorrow.

As a representative am grateful and I thank you exceedingly for efforts being made to feed children in a proper balanced way and to give them the right education so that they grow up to be complete human beings and are a boon to the society.

There is hope in African community and it is undeniable comment for the support rendered to some poor Ugandan families recently HHF donated cash to Halima who was poured on acid and it had hindered her progress, because she was neglected and abandoned by every one in the community.

She is now a self-reliant adult who runs her small business and living happily because of HHF.

In our strategic plan of 2010, we have farming and we are looking forward to launch a farming program where we are going to plant fruits, vegetables, food and keeping pigs so that we cut down the high costs of food.

Secondly, if we reduce financial burden, in that our representative in hand with the farm manager they will provide market to any exceeding planted fruits, vegetables and food to be sold and it will boost our incomes.

Farming will be an advantage to some of our growing children to instill a sense of duty, unity and children shall be trained at the farm to be responsible for their future.

I salute all of you who work hand in hand with our president Mrs. Christine Fenboeck and the family to promote HHF in Uganda.

Any donation makes a difference in Uganda.

Alice Kisakye
